

Appendix 1- The graphs below illustrate the number of children and number of families supported through the Local Authorities Early Years and Childcare provisions during the lockdown period, as well as the numbers of children subject to child protection, or with SEND:

Graph 1: This graph shows the number of children attending across the 16 Little Owl sites between 8th June and 14th August 2020.

The dotted blue line is the trend line which demonstrates if attendance was increasing or decreasing during this time. The sharp decrease occurs as the sessional children who attend on free early education entitlement do not attend during the summer period.

Graph 2: This graph shows the number of families supported each week between April and August 2020.

The numbers are based on the number of actual families associated with those children who have attended.

Graph 3: This graph shows a breakdown of those children attending the 16 Little Owl sites between the end of March and end of August 2020.

Key:

Blue Line shows those children who attend, with social worker involvement e.g Child Protection Plan, Child in Need Plan.

Orange line shows those children with Special Educational Needs and Disability (SEND).

The dotted line shows the trend of supported children with social care involvement or SEND.

N.B A full session is 1 child for 10 hours so the figures show some children attending half days or shorter sessions.
